

*Support, Educate, Advocate*

## **Who We Are**

PTC software products are constantly evolving. What can you do to keep up with these changes? How can you quickly learn to take the best advantage of these advanced capabilities? Whom can you contact for help when there's no one else in your organization to advise you?

The answer to all of these questions can be found in PTC/USER, the official international organization of PTC product users. PTC/USER is an independent professional forum that provides education about PTC products, promotes the exchange of information among users, and presents a unified voice in shaping the development of PTC software. The focus of PTC/USER is to support, educate, and advocate.

PTC/USER's information exchange programs – ranging from Regional User Groups – to Technical Committees – to advanced internet services – enable you to share solutions with colleagues in other companies and industries around the world. When you are facing technical challenges, you can tap into this international bank of expertise for support. And as a member of PTC/USER, you can directly influence the product enhancements PTC chooses to implement.

## **Who Can Join?**

Anyone who owns, or works for a company that owns, at least one seat of a PTC product may join. There is no cost for membership. Please visit our website at [www.ptcuser.org](http://www.ptcuser.org).

***JOIN TODAY!***

## User Group Benefits Include...

# (TCs)

### TECHNICAL COMMITTEES

An ideal way to work hand-in-hand with PTC's product developers and to exchange information with colleagues regarding specific product modules is through PTC/USER's Technical Committees (TCs). Not only are the TCs a forum for the exchange of information, they also play a crucial role in the evolution of PTC software. TCs are a key ingredient of how PTC/USER helps to drive the direction of PTC products.

### INTERNET SERVICES

PTC/USER internet services provide an easy way to pose questions to fellow PTC software users worldwide, learn from the best practices of others, and keep current with PTC/USER activities. These services, included with your membership, are available to you at [www.ptcuser.org](http://www.ptcuser.org).

### REGIONAL USER GROUPS

PTC/USER supports Regional User Groups (RUGs) operating in locations throughout the United States, Europe, South America, and Asia. These are small groups of dedicated users of PTC software, including users from novice to expert. The meetings take place locally and usually require a minimal time commitment. Because RUG members are often in same or similar industries, meeting agendas can focus on specialized areas or topics.
